REASONS TO BUY THE CONTACT HERBICIDE APPLICATOR

- Acceptable acquisition costs and cheap operation
- Suitable for liquidation of high weed in various crops
- Your crop will get maximum moisture and sunshine after removing of weed, resulting in higher production

- Easy attendance – adjust the working rolls just above the crops and all higher weed will be killed by the application
- Suitable for working in different heights and due to it applicable for a wide range of weed
- Saves your money – the chemical is applied only on that part of the application roll, which comes into contact with the weed
- Friendly to the living environment – the chemical is not sprayed in the surrounding air
- A relatively thin solution of the chemical is sufficient to kill the undesirable weed – a weed free means higher crop and due to it even higher profits

- The remote control for easy attendance and operating of the nozzles
- Easy maintenance
- The machine was approved by the State Phytosanitary Administration and found in conformity with the EC regulations

- 12 month guarantee
- Guarantee and after-guarantee service ensured
